Summary

This is a remix adding some details: Filippi-style drawing on the boat, shoes and water number.

Sports & Outdoor > Outdoor Sports

Tags: boats scull rowing

The different parts of the boat have to be printed separately and then put together with some glue; they also get stuck one inside the other. I printed this also with MMU2 but I don't suggest it: the wipe tower required a huge amount of filament and white parts didn't come so clean. The rowing stands rope should be printed in TPU.
